QND Computer Science Day 10

Mr. Schmidt

Today

- Turtles

Project

- Make some art!
  - Whatever you want!
  - **Keep it appropriate!**
  - Think Etch a Sketch, not Mona Lisa
  - Make it unique
    - Do not just copy my code
  - It *must* include a loop!

Turtles!

- Create a turtle
- Lots of ways to move it around!
- Use `penUp()` / `penDown()` to control whether it is drawing

```
let turtle = turtleConsole.addTurtle()
turtle.penDown() // start drawing
turtle.forward(100) // move turtle 100 units forward
turtle.penUp() // stop drawing
```

Turtles (continued)

- Check the README for details on other Turtle functions
- lineColor, fill, arcs, thickness
