QND Computer Science Day 12

Mr. Schmidt

Today

- Turtle Project
- Custom Colors

Custom Colors

- How does a computer store colors?
- RGB Values
- Hex Codes

Custom Colors in Swift

- Use Google Color Picker to find a color
- Create a new color using `.hex` or `.rgb`

```
turtle.lineColor(.hex("daf542"))
turtle.lineColor(.hex("#daf542")) // With or without # is fine
turtle.lineColor(.rgb(245, 66, 66)) // red, green, blue from 0 to 255
```

Turtle Project Requirements

- Put in a solid effort for the rest of the week
  - Stay on task and add more to your art
  - Take what you've learned from making your first piece and make another!
- Make something unique -- **don't just copy my examples**
- Keep it appropriate
- It *must* include a loop!
