QND Computer Science Day 9

Mr. Schmidt

Recap

- Robots

Bug Hunting

- 30 code examples with subtle or not subtle bugs
- Download from my website
- Hints available on the last page (try without them!)

Compiler Errors

- Some code fails to compile
- Red dots show where the problem is
- Error message gives an explanation
- Sometimes, the message is useless
- Error location is usually a good hint

Runtime Errors

- Program compiles, but isn't working quite right
- Read the description and see what it *should* be doing
- Use "Step Slowly" to watch the program as it executes and see where it's going wrong
